Hawaii, USA | archietalic.com | 808-830-8179 | archietalic40@gmail.com

Premium Websites, AI Automation & SEO Solutions for Businesses

A professional capability profile featuring live web projects, services, technologies, and development process.

About Archie

A business-focused developer building practical digital systems for real business needs.

I design and develop modern websites, custom web applications, SEO-ready landing pages, and AI automation workflows. My focus is not only writing code, but helping businesses create a professional online presence, capture leads, communicate clearly, and launch fast.

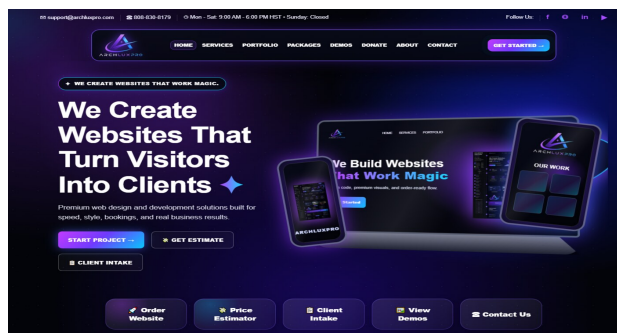

Core Services

Website Design Premium websites, landing pages, responsive layouts, and business-focused user experiences.	Full Stack Development Custom PHP/MySQL systems, dashboards, CMS tools, forms, portals, and integrations.
SEO & Performance Technical SEO, on-page optimization, metadata, speed improvements, and search-ready structure.	AI Automation OpenAI and n8n workflow concepts for lead capture, chatbots, alerts, and customer support flows.
Website Maintenance Fixes, updates, hosting support, backups, SSL, security improvements, and long-term care.	Business Systems Marketplaces, referral systems, booking flows, CRM concepts, and admin workflows when needed.

Featured Live Projects

Selected live projects that show practical web design, development, SEO, and platform work.

Technology Stack

HTML5	CSS3	JavaScript
PHP	MySQL	Bootstrap
WordPress	OpenAI	n8n
Git/GitHub	Cloudflare	CyberPanel
Linux VPS	SSL	Stripe / PayPal

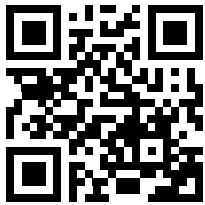

Development Process

01	Discovery Understand the business goal, audience, content, and required features.
02	Planning Map pages, user flow, technology, hosting, and launch requirements.
03	Design Create a clean visual direction focused on trust, clarity, and conversion.
04	Development Build responsive pages, forms, backend logic, integrations, and SEO structure.
05	Testing Check mobile layout, browser behavior, forms, emails, links, speed, and security basics.
06	Launch Deploy to hosting, connect domain, configure SSL, and verify the live site.
07	Support Provide fixes, updates, improvements, and future feature planning.
